

SFI Magnetron75

Magnetron75 is used in architectural and automotive applications to provide heat and light control, energy efficiency, and privacy. It can offer improved heat rejection and enhanced durability compared to traditional dyed or metallized films.

ADVANTAGES

- Reduce cooling costs
- Reduce glare
- Protect furnishings from fading and UV Rays damage
- High Clarity, less haze
- Standard soap & water technique
- 7 yrs warranty

STRUCTURE

- Thickness: 3mil
- Adhesive: Acrylic pressure sensitive
- 12 layer Multi-Layered Sputter Coating
- Size: 1.52 x 30 meter
- SR Hardness: >2H
- Hard Coat: Scratch Resistant Coating
- Color almost transparent, stable
